EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tom Riley on March 18, 2005.

The application has been amended as follows:

Claim 1 has been amended to:

A wick assembly for use in a dispenser for a volatile liquid, comprising:

a wick having an external surface; and

a discontinuity formed in the surface providing a location in the wick of less resistance to a force applied to the wick than a location adjacent to the discontinuity

wherein the discontinuity is disposed between a portion of the wick adapted to reside substantially inside --a container for the volatile liquid-- and a portion of the wick adapted to reside substantially outside the --container--.

Allowable Subject Matter

2. Claims 1-8, 10, 12-16, 57-61 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, although wick assemblies are known in the prior art, a discontinuity formed in the surface of the wick providing a location in the wick of less

Art Unit: 3752

resistance to a force applied to the wick than a location adjacent to the discontinuity, wherein the discontinuity is disposed between a portion of the wick adapted to reside substantially inside the container and a portion of the wick adapted to reside substantially outside the container in combination with other features, is not known or suggested in the prior art of record.

Regarding claim 14, although an interference fit is known for a wick in the prior art (specifically U.S. Patent No. 6,619,560 to Chun), there is no teaching in the prior art for combination of an interference fit with the other limitations of the claim, the limitations being a discontinuity formed in the surface of a wick providing a location in the wick of less resistance to a force applied to the wick than a location adjacent to the discontinuity and a retention member defining an opening adapted to be received in another opening of a container for holding the volatile liquid and in which the opening of the retention member receives a portion of the wick therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Seth Barney whose telephone number is (571)272-4896. The examiner can normally be reached on 7:30am-5:00pm (Mon-Fri).
